Precipitation probability					
40%	20%	30%	60%	60%	20%

Forecast for Tuesday 16 Feb 2021

Weather: Quite dull and cloudy this morning before some clearer spells later in the day. In the afternoon there will be a band of showers move through Yorkshire Dales from the west, some may turn briefly heavy.

Chance of cloud free mountain/hill tops above 600m: 50%, becoming briefly 70% with cloud breaks developing early in the afternoon.

Visibility: Some breaks will develop this morning as the bases lift from 400m to around 600m however there will be patches of lower cloud for much of the day. Visibility will deteriorate to moderate or poor in showers and cloud will thicken and lower in showers again. More chance of clearance around the more northerly hills in the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level falling during the day but any remaining snow thawing helped along by the overnight rain. Still feeling cool in the strong winds, these easing later in the day.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Tue 16 Feb 2021	1.6mm	9.8mm	9.8mm

Forecast for Wednesday 17 Feb 2021

Weather: A period of rain overnight will clear to leave a brighter day with showers, some of these will turn wintry at high ground as freezing level falls. Some sunny intervals between showers are expected.

Maximum wind: Southerly 20-25mph with gusts 35-45mph.

Chance of cloud free mountain/hill tops above 600m: 40% in the morning, increasing to 70% as rain clears but may reduce as showers move through and cloud covers the hill tops at times.

Visibility: Cloud bases likely to be around 500m in the morning as rain clears but cloud will lift and break leaving good or excellent visibility out with showers. In any showers visibility is likely to become moderate or poor for a time and cloud is likely to lower over the tops to 600m again.

Temperature: **Valleys:** Plus 5 rising to 9 Celsius.
At 600m: Plus 2-3 Celsius
Freezing level: 800-1000m
